REPUBLIC OF POLAND

Headquarters building of the World Intellectual Property Organization (WIPO) in Geneva.

ABOUT THE PROGRAMME

We live in the information society, where a significant role has been given to new technologies. Our life in the 21st century cannot be imagined without the Internet, e-commerce and other information technologies, which enhance business and social communication and stimulate technological progress. New technologies have constantly been creating new opportunities in life and science, building bridges between people from different countries and cultures.

The law which governs exploitation of intellectual creations must respond to new challenges. The Joint Master's Degree Programme in Intellectual Property and New Technologies (MIP & NT) offered by the Jagiellonian University, the World Intellectual Property Organization and the Polish Patent Of-

fice provides a perfect answer to the demand for better understanding of interfaces between technology and intellectual property law and specialised training in these rapidly developing areas.

The Programme offers an extensive learning scheme for legal issues related to new technologies, with special focus on intellectual property law. Particular courses will adopt a comparative approach towards IP regulations, with EU law serving as the prevailing legal regime for Europe. By taking this approach, the Programme attracts undergraduate and graduate students as well as professionals from the public and private sectors who wish to acquire the highly profiled skills in the field.

PARTNERS

One of the oldest universities in Europe founded in 1364, and one of the best universities in Poland according to the national universities ranking, the only Polish and Eastern European higher education institution in Reuter's Top 100: Europe's Most Innovative Universities ranking.

The Faculty of Law and Administration of the Jagiellonian University conducts the most innovative and efficient educational programme, confirmed by independent branch rankings for the best law faculty in Poland.

By offering 16 faculties, over 80 study programmes and 140 specialities, the University provides one of the widest educational offers in Poland. With almost 43 000 students (including 4000 foreign students from 90 countries), 190 foreign staff members and visiting professors and 280 bilateral cooperation exchange agreements it is a recognized educational centre of education and a platform for international cooperation.

World Intellectual Property Organization: global forum for intellectual property policy, services, information and cooperation. As a specialized agency of the United Nations, WIPO assists its 191 member states in developing a balanced international IP legal framework to meet society's evolving needs. It provides business services for obtaining IP rights in multiple countries and resolving disputes. It delivers a policy forum to shape balanced international IP rules, global services to protect IP across borders and resolve disputes, technical infrastructure to connect IP systems and share knowledge, cooperation and capacity-building programs to enable all countries to use IP.

The WIPO Academy is the center of excellence for intellectual property (IP) education and training for WIPO member states, in particular developing countries, least-developed countries (LDCs) and countries in transition. The WIPO Academy works to help build human capacity in IP, which is essential to innovation.

The state administration agency, which in Poland is responsible for implementation of tasks connected with industrial property protection. The main responsibility of the Polish Patent Office is deciding on granting exclusive rights for industrial property objects. One of the basic tasks of the Polish Patent Office is keeping publicly accessible registers with information on the legal status of the protection of industrial property objects on the territory of Poland. Another crucial responsibility is the wide dissemination of knowledge of industrial property protection, the social awareness of which is a necessary condition for efficiency of the legal provisions. What is equally important is promoting modern methods of industrial property rights management, educating the young generation about the basic issues connected with intellectual property, including IP in university curricula, as well as frequent information campaigns intended primarily for entrepreneurs, managerial staff, scientists from universities and research centres, inventors, school and university students, patent attorneys, lawyers and legal advisors, judges and public prosecutors, the customs services and the police.

Main building of the Jagiellonian University in Kraków, built in 1873-1887.

PROGRAMME STRUCTURE

The Programme offers candidates an attractive and user-friendly structure of three semesters between 1 October 2019 and 28 February 2021:

First non-residential semester - October 2020 – January 2021

Getting the basics of IP law (distance learning through a state of the art e-learning platform with partial use of WIPO distance learning courses on copyright, patent, trade mark and design)

Second residential semester - February 2021 – June 2021

Acquiring advanced knowledge on IP law in context of new technologies (premises of the Jagiellonian University)

Third semester - October 2021 – February 2022

Doing own research under supervision (Master's thesis seminar, internship, Master thesis)

Certificate of the most innovative and valuable study programmes

PROGRAMME STRUCTURE - COURSES

Content of the curriculum focuses on challenging issues related to intellectual property and new technologies and offers the following courses:

Introduction to EU Law

New technologies, ethical, social and legal perspective

New technologies and patents

Copyright in the digital age

Commercial communication
